Presented Nighthunter 8x56 is a new model that differs from its predecessors by a new design, a better transmission of light and a larger field of view at 1000 meters. The latest model Nighthunter 8x56 is the result of the nearly 70 years of experience of the Steiner brand in the design of optics. Steiner Nighthunter is the perfect binoculars for night observation. What makes Nighthunter an invaluable companion when hunting under conditions of insufficient lighting is the transmission of light, which in the model presented jumped to an even higher level than its predecessors. If you have a new Nighthunter with you, you will not miss anything, which can not be said for other hunters using the optics of competing producers. The image that can be seen through the 8x56 Nighthunter lenses is characterized by high resolution. Thanks to the Sports-Auto-Focus system guaranteeing a sharp image from 20 meters to infinity, there is no need to re-adjust. Increased field of view. The new 8x56 Nighthunter also offers an increased field of view. For comparison, in Nighthunter Xtreme 8x56 it was 112 meters. In the case of the new model, it is as much as 135 meters per 1000 meters. New design. The appearance of the housing that characterizes modernity has also changed. Its texture and ergonomics guarantee a secure grip even at increased humidity or at low temperatures. In addition to new solutions, the Steiner Nighthunter Xtreme 8x56 has the same advantages as its predecessors. Just like other models of optics, Nighthunter provides sharp, high-resolution images thanks to modern coatings. It also has resistance to pollution and water, thanks to Steiner Nano-Protection. Moving the binoculars makes it easier to attach the Steiner ClicLoc strap, ensuring fast and efficient pinning and detaching the binoculars from the strap. The set includes a case, lens caps, rain covers and a ClicLoc strap. Technical parameters: Lens diameter: 56 mm; Zoom: 8x; Exit pupil: 7 mm; Construction of prisms: porropryzmatyczna; Material of glass elements: optical glass BaK-4; Field of view: 135 m / 1000 m (7.7 °); Twilight efficiency: 21.2; Anti-reflective layers: MC; Rubberized body: YES; Resistance to weather conditions: YES; Nitrogen filling: YES; Focus adjustment system: individually in the left and right eyepiece, STEINER Sports-Auto-Focus; Case: YES; Attaching the strap: ClicLoc; Weight: 1090 g; Usage: scenery, birds, hunting, sailing, military; Warranty: 30 years.
