

teleskopy.pl

Excellent WO 7x50 ED binoculars made of low dispersion glass, highly valued by hunters, ornithologists, sailors and astronomy lovers.

Characteristics

- ED (Extra low Dispersion) provides excellent chromatic aberration correction
- high optical efficiency and sharpness of the image to the very edge of the field of view
- water resistance, nitrogen filling
- individual focusing, large depth of field (no need to focus on the distance)
- large field of view (7.5 °, 131 m / 1000m)
- shockproof housing and a strong, stiff case
- Twilight (twilight factor): 18.7

Includes lenses and glasses covers and a belt case

Technical parameters

- Lens diameter: 50mm
- Zoom: 7x
- Output: 7,1mm
- Construction of prisms: porropryzmatyczna
- Material of glass elements: optical glass BaK-4
- Anti-reflective layers: FMC, blue
- Field of view: 7.5 ° / 131m / 1000m
- Eye relief : 23mm
- Relative brightness: 49
- Twilight efficiency: 18.7
- Adjusting the focus: individually for each eyepiece, +/- 5D
- Minimum distance of observation: 7 m
- Range of eyepieces / output gauges: 56 mm - 74 mm
- Water resistance: YES
- Nitrogen filling: YES
- The option of connecting a tripod: YES
- Weight: approx. 1.4 kg (about 1.5 kg with the equipment, about 2 kg with a case)
