Great azimuthal rigidity that will be appreciated by spyglass holders and heavy binoculars. Syntax AZ-3 ensures high precision and stability, has a height adjustable tripod and a large table for accessories. It is equipped with flexible microtubes knobs to adjust the vertical and horizontal settings, so that observation and tracking of even very distant objects is very simple and effective. The AZ-3 assembly is also often used for visual astronomical observations. It can be used to install 130/900 and 150/750 optical tubes (Pentaflex, Sky-Watcher, Spinor Optics) for observing aircraft at cruising altitudes, similar to Dobson telescopes. ∅ maximum working height: 134 cm ∅ distance between the legs at the maximum height: approx. 105 cm ∅ the distance between the legs at the minimum height: 65.5 cm We recommend: ADAPTER 1/4 "ASSEMBLY AZ-3 Warranty 2 years
