

A binocular tripod adapter allows you to mount the binoculars on any tripod with a 1/4 "thread (standard thread in the heads of photographic tripods). Due to its narrow design, it can be successfully used with binoculars, if the binoculars are equipped with a female 1/4 inch socket. This mounting is appropriate for binoculars weighing up to 1 kg Technical parameters ∅ height: 90 mm ∅ thickness of the adapter halfway up: about 4.5 mm ∅ foot length: 45.5 mm ∅ the width of the foot: 36 mm ∅ Knurled knob ∅ foot with non-slip rubber lining ∅ weight: 45 g
