Delta Optical Forest II 10x50 is a robust roof binoculars with universal parameters of magnification and lens diameter. A good choice for field observations "at hand", for bird and hunter observers both during the day and at night. Good coatings on all optics (MC on objectives and eyepieces, phase coverage on prisms) are a guarantee of the reproduction and clarity of images obtained. High resistance to weather conditions (O-rings and nitrogen filling) and resistance to mechanical damage (rubberizing) ensure the longevity of the binoculars. Includes a neck strap, lenses covers and glasses, and a carrying case with a belt

Technical parameters

- Lens diameter: 50 mm
- Zoom: 10x
- Exit pupil: 5 mm
- Construction of prisms: roof
- Optical system: 8 elements in 6 groups
- Material of glass elements: Optical glass Bak-4
- Field of view: 94 m / 1000 m
- Retracting the output pupil: 13 mm
- Minimum distance of observation: 5 m
- Twilight factor : 22.4
- Adjusting for eye defect: +/- 4 D
- The scope of adjustment of the spacing of pupils: 55 - 73 mm
- Eyecups: adjustable, twist-up type
- Waterproof: yes, up to 1 m to 30 minutes
- Anti-reflective layers: FMC (Fully Multi-Coated), PhC (Phase Coating - phase coatings on prisms)
- Dimensions: 165 x 133 x 60 mm
- Weight: 870 g
