

The Red Dot laser target sight from Yukon supports aiming with all devices - night vision lunettes and telescopes. It can be mounted on any device with the standard Weaver rail. It is a popular addition to the sights of the Yukon NVRS and Sentinel, it can also be used with any night-vision equipment equipped with the mentioned Weaver rail.  $\varnothing$  rail: Weaver  $\varnothing$  Beam power: 4 mW  $\varnothing$  length of the emitted wave: 633 nm  $\varnothing$  beam adjustment:  $\pm 2^\circ$   $\varnothing$  power supply: 3V (2x LR44 1.5V, included)  $\varnothing$  length of the switch wire: 30 cm  $\varnothing$  length (with rail): 6.8 cm  $\varnothing$  weight: 80 g (with assembly) **YOU SHOULD NOT LOOK LASER'S VISION - IT IS DANGEROUS FOR THE SIGHT.** (above: Weaver on Yukon 2.5x50 Sentinel telescope)
