

Celestron C90 is a slim spotting telescope in the Maksutov system with a diameter of 90 mm, appreciated as a portable astronomical telescope, nature telescope and telephoto lens. Often chosen by aircraft observers at cruise altitudes.

Technical parameters

- optical system: Maksutov-Cassegrain
- Diameter: 90 mm
- focal length: 1250 mm
- light transmission: 1/14
- finder: 8x21
- eyepiece: 32 mm (1.25" / 39x magnification)
- Angular field of view for the eyepiece in the set: 1.3 °
- linear field of view for the eyepiece in the set: 23 m @ 1000 m
- distance between the eyepiece and the eye: 20 mm
- the smallest focusing distance: 4.57 m
- coatings: Multi-Coated
- tripod mount: yes
- camera mount: optional
- Adapter
- tube length: 406.4 mm
- nylon case included
- weight: 2.27 kg

Equipment

- eyepiece: 32 mm / 1.25 "
- Optical finder 8x21
- 45 ° angle cap
- nylon cover
