

The Delta Optical Sailor binocular family is expanding! This time, we recommend a pair of 8x42 binoculars, which has the same features that the previous models are known for. Its waterproof, bright yellow rubber housing is filled with dry nitrogen, which counteracts evaporation from the inside. Rubber guarantees a secure grip and its color is perfectly visible in all conditions. Large and clear BaK-4 glass prisms and lenses coated with multilayer anti-glare coatings ensure high image quality. Both the diameter and the magnification of the Sailor 8x42 model put it among the most universal binoculars, which give the optimal combination of magnification, brightness of the image with small dimensions. The binoculars are equipped with a convenient central focusing knob and diopter adjustment on the right eyepiece, as well as a tripod socket, and most importantly, twist-up twist-off eyecups. Technical parameters

- Zoom: 8x
- Lens diameter: 42 mm
- Optical system: achromatic lenses + BaK4 porro prisms
- Focus system: central + tuning in the right eyepiece
- Anti-reflective layers: MC
- Blend pixel: 5.25 mm
- Retracting the output pupil: 20 mm
- Minimum observation distance: 6 m
- Angle field of view: 7 °
- Linear field of view at 1000 m: 123 m
- Nitrogen filling: Yes
- Water resistance: Yes
- Dimensions: 165 x 65 x 155 mm
- Weight: 940 g
- Usage scenery: Hunting sailing nature military
- Warranty: 2 years
