The Fotopro M-5 Mini tripod was created for photographers looking for high-quality equipment that occupies little space and has great potential. The technology of forging tripod elements, quality of materials and accuracy allowed to create a tripod with exceptional precision and durability in all conditions. The M-5 Mini tripod is made of aluminum and magnesium alloys. The central column can be mounted in reverse (upside down), making it easier to macro photography. It is built of two modules. Using only one of them, the minimum working height of the tripod is only 13 cm. The tripod has a three-leg inclination system. The legs can also be folded back in order to reduce the dimensions for transport. The leg clamps are based on the original G-LOCK system, thanks to which you can change the configuration of the tripod in a quick and easy way. The standard 1/4" thread allows mounting any head (with 1/4" thread) or directly on the camera / camera. The set includes the sensational ball head Fotopro FPH-53P. The head has a set of contour lines and a certain lock of the quick coupling to prevent accidental release. The tripod is ideal for use with DSLRs, mirrorless cameras, compact cameras and cameras. The set includes a comfortable cover that allows you to attach a tripod to your belt or bag. A very shapely tripod for people practicing shooting sports, to put on a table. Characteristics

â€” complete ball head with a set of contour lines and a quick-release block â€” inverted central column â€” a two-module

central column • the possibility of folding the legs of the tripod in reverse • G-LOCK leg locking • made in technology of forging from aluminum and magnesium alloys Technical parameters • model: M-5 Mini • materials: aluminum, magnesium • maximum working height: 47 cm • minimum working height: 13 cm • length after folding with the head: 16.5 cm • maximum leg diameter: 22 mm • minimum leg diameter: 13 mm • distance between the legs at the maximum unfolded: 25 cm • number of sections: 4 • tripod weight: 0.78 kg • maximum load: 3 kg • included: photopro FPH-53P head, shoulder strap
