

Zoom eyepiece with focal length adjustable from 24 to 8 mm, with aspheric optics and full coverage of MC layers. Excellent mapping, impeccable mechanics and 2" and 1.25" mounts - the perfect all-in-one eyepiece for telescopes of all optical constructions. Technical parameters

- Focal length: 8-24 mm (zoom)
- Own field of view: 66 - 43 ° (@ 24 - @ 8 mm)
- The distance of the output pupil: 15 - 20 mm
- Diameter of binding: 2", 1.25"
- Anti-reflective layers: FMC
- Construction: with aspherical elements, 7 elements
- Weight: 377 g
- Warranty 2 years
