

ZWO camera ASI178MC is a color CMOS camera with 6.4 M pixels resolution with Sony STARVIS IMX178 sensor. It is characterized by very low noise and high sensitivity, being a very advanced tool for astronomical photography and in high-resolution microscope photography. In the set with a 2.5 mm lens, the view is almost 170 °, so it is also a very good all-sky camera (all over the sky). Technical parameters ∅ matrix: 1 / 1.8 "CMOS IMX178 ∅ resolution: 6.4 Mpix 3096 x 2080 ∅ single pixel size: 2.4µm ∅ die size: 7.4 mm x 5 mm ∅ diagonal matrix: 8.92 mm ∅ range of exposure times: 1/1000 s-1000 s ∅ ROI (selection of the area of ∅∅interest): yes ∅ ST4 guiding port: yes ∅ depth of the die seating: 12.5 mm ∅ shutter type: rolling shutter ∅ matrix protection: yes, with IR-cut ∅ compatibility with operating systems: Mac, Windows, Linux ∅ transmission connection: USB 2.0, USB 3.0 ∅ ADC (bit rate) resolution: 14 bit ∅ connection to the telescope: 2", 1.25" (toe), T2 ∅ dimensions: ∅ 62 mm x 36 mm ∅ weight: 120 g (without lens) ∅ operating temperature range: 3 °C - +45 °C ∅ storage temperature range: -20 ° - +60 °C ∅ range of relative humidity: 20% -80% ∅ range of
