

The Glock knife series was developed in 1975 by the Austrian company Glock. Just one year later in 1976, he became the official assault knife of the Austrian army. To this day, it is continuously equipped with many units all over the world (including the Polish army). Currently, as a legend, he is eagerly bought by soldiers and civilians. Glock 81 is easy to build, well balanced and extremely durable. The blade is made of thick blackened stainless steel. On the upper part of the blade there is a very effective double-row saw that allows you to cut even a thick branch. The handle is made of the same hard polymer, which is used for the production of Glock pistols. The metal sled protects the hand against uncontrolled slipping onto the blade. One side of the handguard serves as a bottle opener. The vagina is made of the same polymer as the handle. It has a strong clip that will not allow you to slide the knife. The belt clip is designed to fasten without interlacing the entire strap. Recommended for survival trips and for collectors. Technical parameters / functions

- â€¢ knife blade length: 16.5 cm
- â€¢ total length: 29 cm
- â€¢ black colour
- â€¢ steel: stainless steel HRC55
- â€¢ wei 202 g
- â€¢ cover: polymer
- â€¢ knife handle: polymer
- â€¢ manufacturer's symbol: Glock 81
- Warranty 24 months
