

teleskopy.pl

WO SemiApo is a wonderfully sharp tourist-nature binoculars. Thanks to the nitrogen filling, it will work perfectly on the water, and the well-corrected, 5-degree field of view encourages the orientation of the binoculars to a starry sky.

Technical parameters

- waterproof (nitrogen + o-rings, withstands immersion up to 1 meter to 15 minutes)
- Brightly corrected colors, semi-apochromatic design
- all coated lenses (FMC)
- BaK4 roof prisms with a silver layer for raised transmission
- perfect for bird watching - blades from 2.5 meters
- the right choice for wearers of the goggles (adjustable shells, offset of the 19 mm)
- very light
- rubber body made of casting - securely holding, shockproof, durability
- transport bag, belts and caps included

Technical parameters

- magnification: 10x
- Lens diameter: 42 mm
- Blow diameter: 4.2 mm
- eye relief : 19 mm
- lens design: semi apo / ED
- prisms: roof, BaK4, phase coated
- optical coatings: FMC (fully coated optics)
- minimum observation distance: 2.5 m
- sharpening system: CF (central control knob + adjustment in the eyepiece for eye defect)
- water resistance: yes
- field of view: 87 m / 1000 m / 5 °
- weight: 650 g
