Collimator Vortex Sparx AR 1x22 was created for shooters who, from sighting devices, require that they minimize their reaction time to a minimum, so that they always win. Simple, fast, effective aiming is the advantage that collimator sights have. And that's exactly what the new Sparx AR offers you - placed in a durable, lightweight, compact rubber housing. The digital control panel located near the base is easily visible and accessible from the level of the shooter. The delicate MOA size 2 allows precise aiming, and thanks to the memory of the last mode, its brightness does not change when the device is switched on again. Characteristics

- anti-reflective coatings for very high optical efficiency
- a sealed tube ensures water resistance and protects the collimator from dust
- nitrogen filling prevents internal evaporation
- high resistance to shock - it is resistant to falls
- enables fast aiming
- unlimited distance from the eye - no matter how far you position the eye from the collimator, each target will track quickly and accurately

Technical parameters

- magnification: 1x
- Lens diameter: 22 mm
- distance from the eye: unlimited
- spot color: red
- size: 2 MOA
- step adjustment: 1 MOA / click; 45 MOA / turnover
- height adjustment (max): 90 MOA
- airflow control (max): 90 MOA
- length: 7.3 cm
- weight: 213 g
- lifetime VIP guarantee: yes

Warranty Lifetime warranty: if anything happens to your telescope, Vortex will repair it or replace it with a completely new one. * The warranty does not cover the loss, theft or intentional destruction of the telescope.
