Binoculars Lunt Engineering MS 10x50 FMC:

- ideal for observing the sky
- built-in connection to a tripod
- filled with nitrogen
- very good quality of optics allowing to obtain faithful and contrasting images even in worse conditions
- all optical surfaces coated with FMC coatings
- high strength thanks to the body made of magnesium
- high power to collect light

Technical parameters

- Lens diameter: 50 mm
- magnification: 10x
- Excavation: 5 mm
- construction prisms: porroprism
- field of view: 6.5 ° / 114 m / 1000 m
- glass in prisms: optical glass BaK-4
- Twilight efficiency: 2
- relative brightness: 25
- lens coatings and prisms: FMC
- minimum observation distance: 6 m
- the back of the pupil: 20 mm
- dimensions: 190 x 215 x 72 mm
- weight: 1340 g
