

We present you the Ruike Hornet F815 knife. The knife blade is made of Sandvik 14C28N stainless steel, so that the knife will stay sharp for a long time and be easy to sharpen. The Hornet F815 knife knives are made of G10, and thanks to the textured surface the knife is firmly in your hand. Together with the knife from the manufacturer, we get a plastic sheath, thanks to which we are able to attach a knife to the belt or to your order. Technical parameters / functions
