

The Fenix HP25R headlamp is equipped with two headlamps of different light intensity. The first spotlight illuminates our immediate surroundings with a wide sheaf of light. Reflector with a strong concentration effectively illuminates objects as far away as 187 meters with a power of 1000 lumens. This flashlight will work in a very diverse environment, smoothly adjusting the power and diffusion of light to your needs. The HP25R is powered by one 18650 battery. We will check the discharging level by starting the mode prepared for this purpose. According to the latest trends, the battery will be charged via the built-in micro USB port that connects to the power bank, computer or phone charger. Technical data

- number of modes: 9
- maximum lighting power: 1000 lm
- Dual Light Beam System: is
- maximum range: 187 m
- resistance to fall: up to 1 meter
- tightness class: IP66
- housing: MIL-SPEC duralumin
- lens: glass with AR layers
- power supply: 18650 x 1
- weight: 183.5 g (without batteries)
- included: torch, Fenix ARB-L18 battery (18650, 2000mAh, 3.6 V, Li-ion), micro USB cable, spare gasket
- Warranty 60 months
