

FENIX UC01 is a compact flashlight in the form of a key ring, equipped with an integrated polymer lithium battery and a powerful NICHIA diode with a maximum light output of 45 lumens. FENIX UC01 is a flashlight in the form of a key ring, which is perfect for everyday use. This small device generates a maximum light output of up to 45 lumens, which is sufficient to illuminate the way, finding keys in a bag or reading in a tent. The polycarbonate body of the flashlight has an IPX6 resistance class, can withstand a fall of 1 m, can be exposed to intense rain and temporary flooding. The flashlight is powered by a built-in lithium-polymer battery, which is charged via a micro-USB socket. To do this, all you need to do is connect a laptop or bank power flashlight using a standard micro-USB cable. The full charging process takes approx. 120 minutes. The flashlight has a battery level indicator. The diode changing the color, clearly indicates the need to connect the flashlight to the charging. The protection system protects against overcharging and deep discharge of the battery. The FENIX UC01 flashlight uses a powerful NICHIA diode with a lifespan of 50,000 hours. The operator allows selection of one of 3 light levels: low, medium and high. He is also responsible for the constant brightness of light in each of the above modes. Thanks to the memory function, when switched on, the torch automatically activates the last used mode. Depending on the brightness of the light, the flashlight works up to 50 hours (in low mode) A wide angle (102 °) and a working range of light is maximum 7 meters (in high mode) which allows you to comfortably illuminate the space directly in front of you. The FENIX UC01 flashlight is operated by means of one metal button responsible for switching the flashlight on / off, changing the brightness level and activating the battery level indicator. Metal hook allows you to attach a flashlight to keys, clothing or equipment. Technical parameters: 267 number of

modes: 3 • maximum luminous flux: 45 lm • maximum range: 7 m • maximum angle of glare: 102° • maximum working time: 50 hours • lifespan of the diode: up to 50,000 h • waterproof IPX class according to IEC 529: IPX-6 / OB 3 • resistance to fall: up to 1 m • charging: via the microUSB port • dimensions: 62 x 22.5 x 10 mm • weight: 13 g
elements of the set: torch, ring for fixing (eg for keys) Warranty 24 months
