Cinema Pack series filters are made of the highest quality glass with a low refractive index (refraction) of light. ND8, ND16, and ND32 filters will work where we are looking for cinema shots with a low aperture speed. The filters are compatible with the Karma Grip gimbal and Karma drone. Filter frames are made of anodized aluminum. Technical parameters

- filter material: glass covered with multi-layer coatings from the Cinema series
- ND8 filter: ideal for shutter reduction in "cloudy" conditions
- ND16 filter: provides adequate light reduction when shooting on sunny days
- ND32 filter: reduces 5-degree light for filming on extremely bright and sunny days
- a filter case is included in the set
- compatible with: HERO 5 Black (without housing), HERO 6 Black (without housing), Hero7
