A series of FOCUS outdoor binoculars with excellent value for money. They provide unrestricted pleasure of use for years. Waterproof with a rubberized casing coating allowing for reliable and stable grip in hands and resistance to impact. Perfectly balanced in terms of weight. The binoculars are equipped with a large focusing knob, which makes gloves easier to use. Constructed based on high-quality BaK4 prisms coated with anti-reflective layers, which allows for a clean and sharp image reproduction with excellent color space throughout the entire field of view. 25 mm binoculars are the type of binoculars that should always accompany you when traveling, climbing mountains or walking in the woods. The 32 and 42 mm models are the perfect solution for versatile applications, from hunting to bird watching to landscapes.
