Fotopro QAL-60 is a universal quick assembly plate made in the Arca-Swiss standard. The quick connector allows you to quickly attach the camera or camcorder to the tripod head. High-quality aluminum alloy and anodizing process to which the surface of the tile has been subjected, ensure its aesthetic appearance and resistance to abrasion. The standard 1/4 inch mounting screw with a convenient tightening handle allows for simple and solid mounting of the camera, camera or other accessories. Rubber, non-slip linings on the top surface of the plate ensure secure and secure fastening of the equipment. The quick connector also has additional protection against accidental slipping out of the head. The Fotopro QAL-60 quick assembly plate is designed to work with Fotopro heads and tripods by default. However, the Arca-Swiss standard also ensures its compatibility with equipment from other manufacturers.
